# EN874   SKYMASTER PCI-E 1394A CONTROLLER CARD

Introduction

This PCI-Express IEEE 1394a Firewire controller card is designed based on the IEEE standard 1394-1995 and 1394a-2000 specifications. It can provide data transfer rate up to 400Mbps therefore it is an ideal platform for connecting external high performance devices such as the external memory storages. It is also perfect for video/Audio capturing and editing. Furthermore, this controller card can be configured so that two or more computers to be connected together as a local area network via the IEEE 1394a connection.

Features & Specification

• Complies with PCI-Express Revision 1.1 with data transfer rate up to 2.5Gbps
  Complies with PCI Power Management Interface Specification 1.1
  Complies with IEEE 1394 OpenHCI Specification V1.0 and 1.1
  Complies with IEEE 1394-1995 and 1394a-2000 standard
  Supports transfer rate of 400 / 200 / 100Mbps
  Fully interoperable with FireWireTM and i.LINKTM implementation of IEEE 1394 Standard
  Fully Plug & Play and Hot Plug supported
  Driverless for Windows 7 / Vista / XP / 2000 / ME / 98SE / Server2003-2008 32/64-bit, Mac O/S. For Linux, you will need to install the Linux driver manually
